

**Safeguard Your IT Systems.  
Data-driven Intelligence.  
AI-empowered Security.**

**QAX**

Leader in next-generation cybersecurity

# About Us

QAX is the Official Cyber Security Services and Anti-virus Software Sponsor of the Olympic and Paralympic Winter Games Beijing 2022.

## Mission

“ Make the cyberspace safer and make the world a better place. ”

## Vision

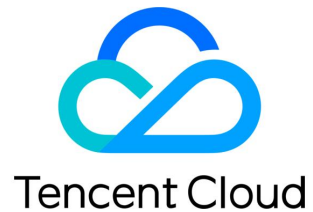

“ Become the world's No.1 cybersecurity company. ”

## Values

Customer First | Innovation First | Collaboration First | Responsibility | Integrity and Embracing Changes

- **China's largest** cybersecurity group as a public company.
- **\$3.2 billion** total market capitalization in 2024.
- **10,000+** employees.
- **40%+** dedicated to R&D.
- **15** cybersecurity labs.
- **1,039** authorized patents.
- **Cover full life-cycle** of cyber security.
- **160+** Proprietary Products & Services.
- Providing cybersecurity solutions to governments and enterprises.

# Customers Who Trust Us

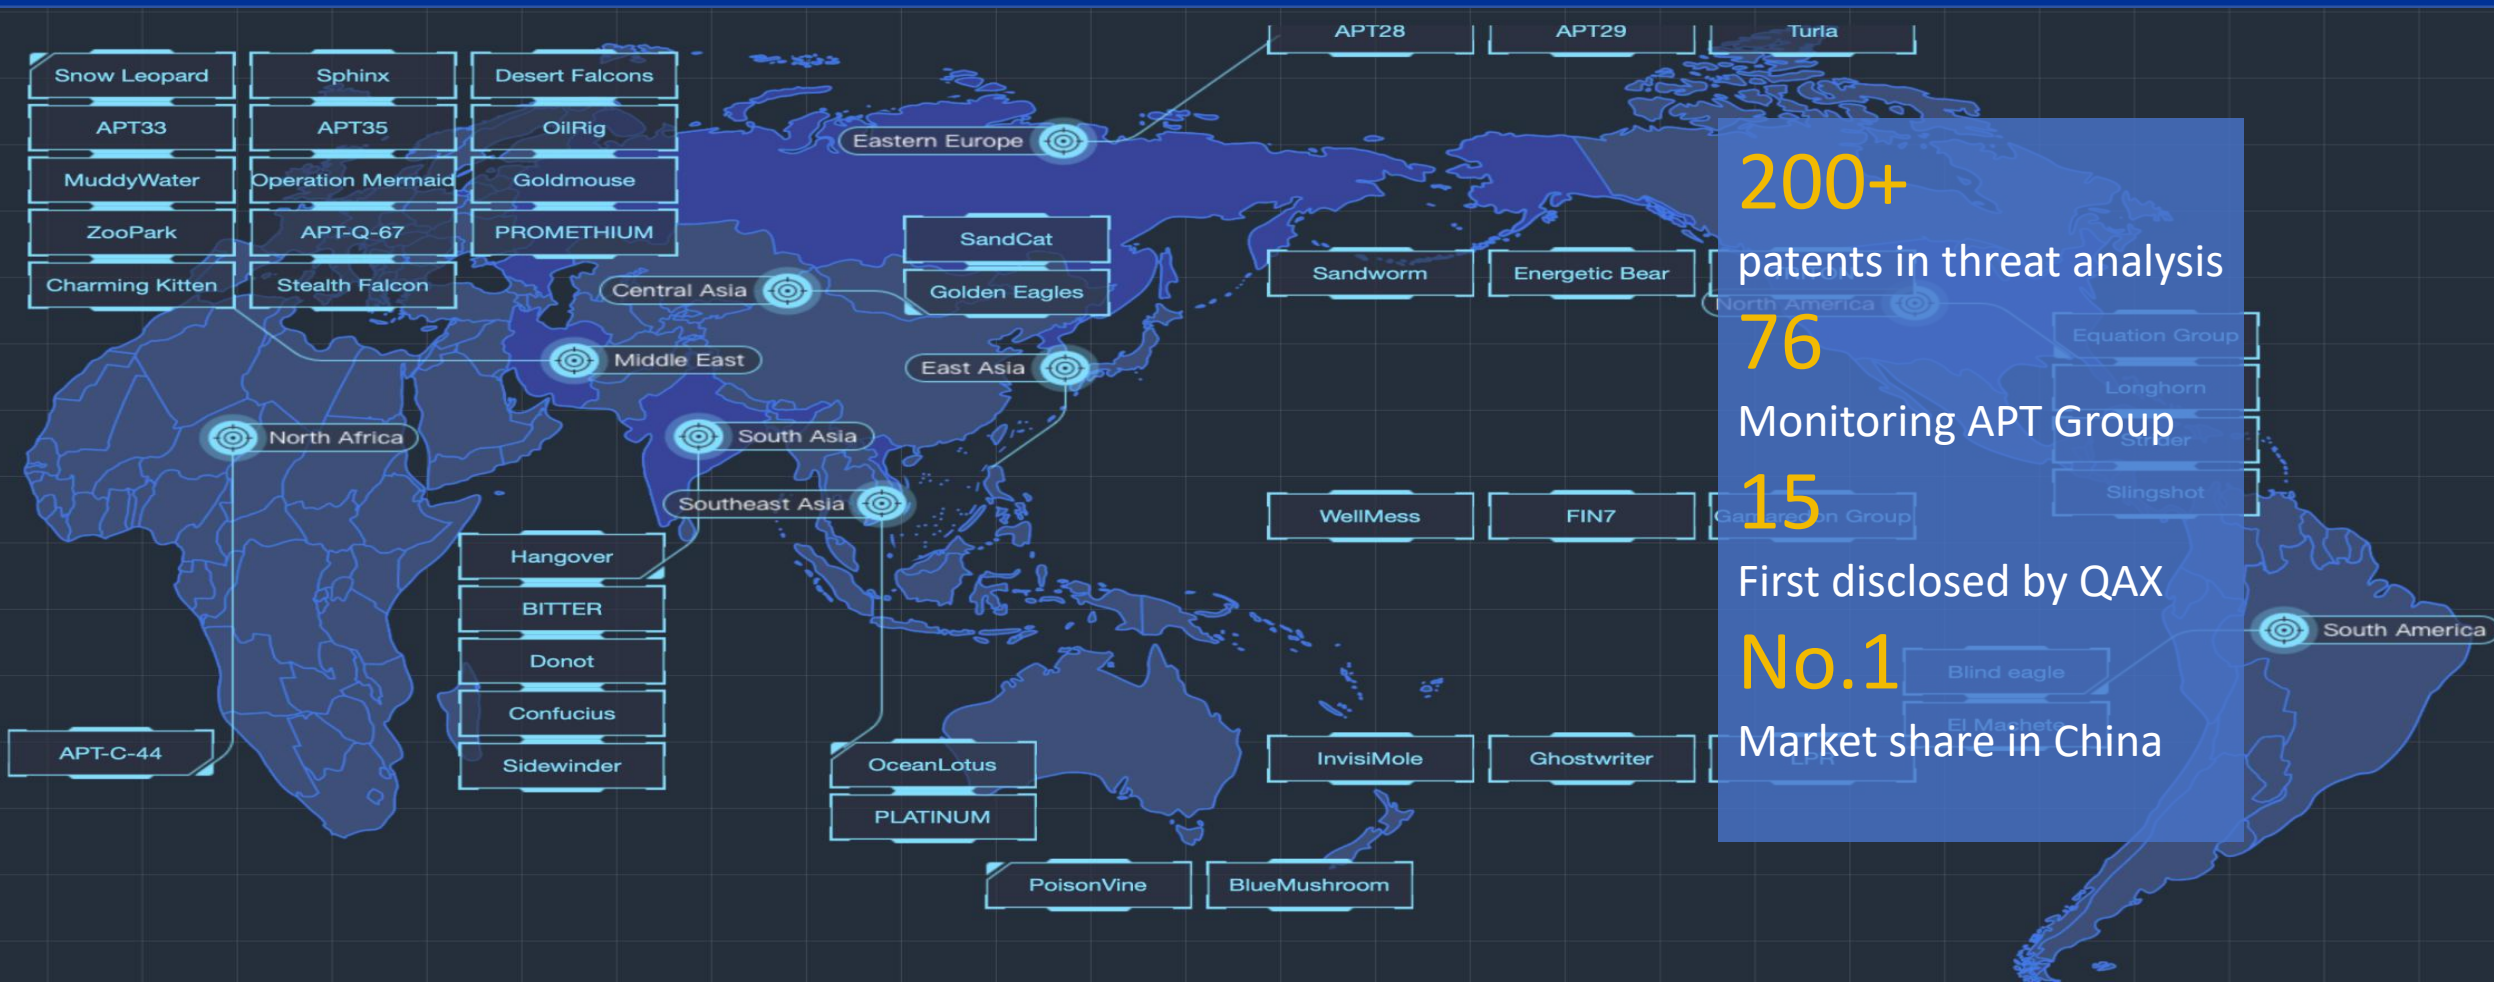

# Our Cyber Security Solutions

# Capabilities and Strength in ATP Research

- The largest APT intelligent producer in China.
- Provide APT intelligence, system and services to detect and respond APT attacks.

# Technical Advantages

## Threat Intelligence

---

One of the top 3 largest Cyber Threat Intelligence vendors in the world. We provide APT intelligence, system and services to detect and respond real-world attacks.

## Vulnerability Operation

---

The largest vulnerability database in China. We provide vulnerability solutions to continuously discover, manage and operate the vulnerability.

## Education & Labs

---

The largest cyber security training base in China. And 20+ cyber security lab solutions are being provided to large enterprises and governments.

# Why Choose QAX?

| Honors                                                                                                                                                                                       | Solutions                                                                                                                                                                                                                          | Customization                                                                                                                                                                                   | Localization                                                                                                                                                             | Capabilities                                                                                                                                                                                                          |
